

FBN MONEY MARKET FUND

Fund Factsheet as at – 31st October, 2012

Fund Description & Objective

The FBN Money Market Fund is an open ended mutual fund which invests strictly in short term money market instruments including Treasury Bills, high quality commercial papers/notes, bankers' acceptance and fixed deposits.

The primary objective of the Fund is to provide investors with an opportunity to earn an above average current income stream over a short term period consistent with preservation of capital and liquidity.

Investor Profile

The Fund's risk profile is classified as "low". It is suitable for investors:

- seeking regular income
- want to be in near cash
- require capital preservation
- regular savings scheme

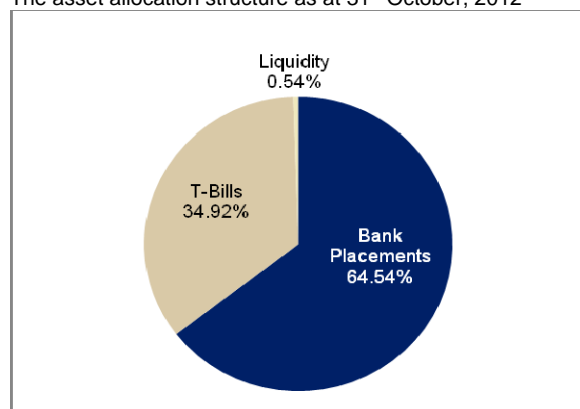

Asset Allocation Structure

The investment limits per asset class within the portfolio are as follows:

Asset Classes	Limits
Bank Placements	10 - 75%
Treasury Bills and other Short Term Government Securities	25 - 80%
Other Money Market Instruments	10 - 75%

Current Asset Allocation

The asset allocation structure as at 31st October, 2012

Assets are currently skewed in favor of bank placements as short term rates are higher for bank tenured deposits, in comparison to Treasury Bills

Current Yield*

Month End	Oct-12
Fund	10.83%

*Performance shown is past performance and the fund manager cannot guarantee comparable future results. Current performance maybe higher or lower and is dependent on market conditions.

Maturity Profile

Time Period	Average Yield	%
0-30 Days	14.50%	47.76%
31-90 Days	13.74%	82.24%

Investment Benefits

- Quarterly income streams
- Suitable for risk averse/near cash investors
- Professional management at an affordable price
- Capital Preservation
- Liquidity Provision
- Competitive returns that rival direct money market placements
- Diversification to an existing equity portfolio or real estate investment

Risks

- Unanticipated changes in monetary policy
- Credit risk
